

Business processes are the foundation of every organization. By leveraging the VEA Solution for Project Management, your organization can accelerate its initiative success and performance. The ARIS Platform enables full visibility and management of your processes, driving the creation of real business value at any level. VEA delivers a structured methodology and offers expert guidance throughout the entire process lifecycle from project management, workshop facilitation, and training to process cost analysis, execution optimization and governance.

People, Process, Information and Technology

The people in your organization require the experience and ability to design, analyze, improve and manage process excellence. Implementing an effective BPM program requires an understanding of organizational goals and how they impact key business objectives. The information shared among processes of your organization must be consistent. This can only be achieved through centralized project and process governance. The technology is the platform your organization uses to deliver throughout the project life cycle.

VEA Solution for Project Management

Using the VEA Solution for Project Management, your organization can definitively realize its process performance initiatives faster. This approach ensures the long-term value of your process management program and allows your team to focus on analysis and execution. VEA has experience with various companies across multiple disciplines of process management, and we utilize strategic methods to deliver solutions that are practical, repeatable and cost-effective.

Business Process Services:

Business processes drive every organization. Accurate understanding and optimization of these processes are fundamental to the creation of real business value. VEA delivers structure and expert guidance for the entire process life cycle: project management, change management, workshop facilitation, training, governance and effective program communication.

VEA's experienced consultants provide:

- Business Process Center of Excellence
- ERP Process Blueprinting and Synchronization
- Business Process Architecture and Reporting
- Process Re-Engineering
- Process Workshop Facilitation
- Process Modeling and Knowledge Transfer

VEA process consultants have experience using various modeling methods, enabling our clients to leverage their own "business language."
